GeoWellCam

GWC BK18

This BK18 is an add-on for our large GWC family. This camera is especially made for TV-inspections in very small wells or boreholes and for geothermal probes. It is specified for 400m water depth and the smallest diameter is 1" up to 4". Combined with the Compass18 module you get a visual inspection and a 3-D deviation report. Please see our Compass18 data sheet.

Because of the small camera diameter is this camera not "connector compatible" to the standard GWC-system. By using a special adapter this camera (with or without compass) can be connected to the GWC-system.

Technical Data	
Kamera	
Operating range	25 to 100mm
Water tightness	40bar
Focus	fix
Light	LED adjustable
Camera diameter	18mm
Camera sensor	no
Power supply Power consumption	from system 5W
Temp. range operation	0 bis 40°C
Temp. range storage	0 bis 40°C
Dimensions	18mm, 170mm
Weight	0,5 kg
