GeoWellCam

GWC BKR45 (BK45)

BKR45 is an axial camera compatible to the Gullyver GeoWellCam family. This particularly rugged camera is used for basic inspections, for which an axial view is sufficient or for critical applications, to avoid damages or loss of a comparatively expensive pan- & tilt-camera. Further specifications of this camera are the water tightness up to 50bar and an operating range from 2" to 10".

This camera is also available as BK45. This version with slightly reduced robustness allows light control, by filling the camera with nitrogen and controlling the inside pressure you are informed about the tightness. All other technical specifications are identical.

| Technical Data | |
|-----------------------|-------------------------|
| Camera | |
| Operating range | 50 up to 250mm |
| Water tightness | 50bar |
| Focus | fix |
| Light | fix LED (or adjustable) |
| Camera diameter | 45mm |
| Camera sensor | inside pressure BK45 |
| | |
| Power supply | from system |
| Power consumption | 5W |
| Temp. range operation | 0 up to 40°C |
| Temp. range storage | 0 up to 40°C |
| Dimensions | 45mm, 170mm |
| Weight | 0,5 kg |
