GeoWellCam

GWC BSK50

This is an extremely compact borehole or water well camera, made for operation in boreholes from 2" to 6", with auxiliary light up to 12", and for depth up to 500m. Regardless of its very compact dimensions the BSK50 camera is a full pan- and tilt-camera with manual focus and integrated, adjustable LED lights. The camera is equipped with an inner pressure sensor for continuous control of the water tightness, a sensor for the inner temperature and connectors for auxiliary light and a very special crawler (Gekko, see our data sheet).

Technical Data	
Camera	
Operating range	50 to 150mm
With auxiliary light	70 to 300mm
Water tightness	50bar
Focus	manual
Light	24 LED adjustable
Camera diameter	36mm
Tilt angle	2x 95°
Rotation	endless
Automatic functions	90° left, right, joints
Camera sensors	inside pressure
	inside temperature
	pan- & tilt-angle
Options	
Auxiliary light	70 to 300mm
Centering device	up to 300mm
Gekko Crawler	see website
Compass	view direction and 2x
Compass	downtilt
Power supply	from system
Power consumption	10W
Temp. range operating	0 to 40°C
Temp. range storage	0 to 40°C
Dimensions	36mm, 225mm
Weight	655g
