

GWC GUL100 Compact

The GUL100 Compact is a mobile cable reel, optimized for borehole and water well applications. Maximal cable length is 100m cable, which will be guided by hand. This cable reel is equipped with an electronic length measurement. Uncontrolled unwinding can be avoided. In this GUL100 Compact the control unit, the video digitalization, and the data overlay electronic are integrated. I.e. for a complete borehole inspection system only the camera and a PC with a special Gullyver control software (GCC-Vision) plus a wireless controller (e.g. X-box controller) or the desktop control are needed.

| Technical Data | |
|-----------------------|---|
| Cable reel | |
| Cable reel | manual operation via crank |
| Cable length | 100m |
| Control (USB) | PC with GCC-Vision |
| Video-out | analog (single end. BNC) digital USB MPEG4 |
| Depth measurement | integrated via USB or at the pulley |
| Option | desktop control panel |
| Power supply | 230 V AC |
| Power consumption | 500W |
| Temp. range operation | 0 to 40°C |
| Temp. range storage | 0 to 40°C |
